

**NWCG CURRICULUM MANAGEMENT ISSUE PAPER #64
REMOVAL OF P-130 WILDLAND FIRE CAUSE DETERMINATION
FOR FIRST RESPONDERS FROM THE PMS
October 5, 2004**

BACKGROUND

When the Fire Investigation Working Team was established it was agreed that several current Prevention (P) courses would be deleted from the Publications Management System and be replaced with Fire Investigation (FI) courses. The P-130 course was one of those targeted courses. In 2002 the Fire Investigation Working Team, in coordination with the NWCG Development Unit, began revision of Wildland Fire Cause Determination for First Responders, P-130 under its new designator, FI-110.

CURRENT STATUS

The development of Wildland Fire Cause Determination for First Responders, FI-110 is nearing completion and will be certified this fall.

RECOMMENDATIONS

When the FI-110 course is sent to the Publications Management System for printing, remove P-130 from the National Interagency Fire Center, Great Basin Cache Supply.

ACTION REQUIRED

A deletion request for this action, signed by the TWT Chair, was submitted to the PMS in May 2004. This issue paper is being created for tracking purposes and to assure concurrence with the Fire Investigation Working Team.
