

## Where are you Today? The Stress Continuum Model

The **Stress Continuum Model** is a visual tool for assessing an individual's stress responses and forms the foundation of Stress First Aid. The model aims to reduce stigma by increasing our knowledge that where you are on the continuum can change. The model helps develop a common language to discuss our stress responses.

*While it is normal to react to stress, there's not a "right" way to react to stress.*

GREEN	Yellow	Orange	Red
<b>READY</b>	<b>REACTING</b>	<b>INJURED</b>	<b>ILL</b>
