

## ICS 209 Report Status

Abbreviation or Acronym: None

Also Known As: Report Version

Short description:

The version of the ICS 209 report (Initial, Update, or Final).

### Controls

Collection, Validation, or Exchange Rules

1. Select Initial, Update, or Final for the current 209 being entered.
2. All 209s except for the Initial and Final are marked Update.
3. Initial - the first 209 created for the Incident.
4. Update - subsequent reports for an existing Incident.
5. Final - the last 209 for an Incident, usually when the Incident has been declared contained, controlled, and/or when the Incident requires only minor support that can be supplied by the organization having protection responsibilities.
6. Select Final if the Incident's duration is one day or it is being added as a child incident into a Complex.
7. There should never be more than one Initial report, but there can be numerous updates, and even multiple finals (as determined by business rules).
8. A new entry defaults to Initial, and Update for any update.
9. A user must indicate Final.
10. Marking a 209 Final removes it from the active incident list the next day.
11. An Incident that has been marked as Final can be found in the Incident Reports list by clicking Only Show Final Approved? box.
12. Must match a valid value.

Data Type: String (1)

Minimum Length:

Maximum Length:

Format/Example: See valid values
