

Projected Incident Activity

Short description:

An estimate of the direction in which the incident is expected to spread, migrate, or expand within a specified time frame.

Controls

Collection, Validation, and Exchange Rules

1. Block 36 of the ICS209 - Projected Incident Activity, Potential, Movement, Escalation, or Spread - collects this information and is a required field.
2. Provide an estimate of the direction/scope in which the incident is expected to spread, migrate, or expand in the next indicated operational period, or other factors that may cause activity changes.
3. Discuss incident potential relative to values at risk, or values to be protected (such as human life), and potential changes to those as the incident changes.
4. Include an estimate of the acreage or area that will be affected.

Data Type: String (3999)

Minimum Length: 1

Maximum Length: 3999

Format/Example: Increased growth of 500 acres expected to the west due to dry conditions and forecasted winds.

Valid Values: Not applicable

Projected Incident Activity Descriptors

The following data elements are used to describe Projected Incident Activity on the ICS209 within wildland fire.

NWCG Data Element Name: Projected Incident Activity 12 Hours

Abbreviation or Acronym: None

Also Known As: None

Short Description:

An estimate of the direction in which the incident is expected to spread, migrate or expand in the next 12 hours.

NWCG Data Element Name: Projected Incident Activity 24 Hours

Abbreviation or Acronym: None

Also Known As: None

Short Description:

An estimate of the direction in which the incident is expected to spread, migrate or expand in the next 24 hours.

NWCG Data Element Name: Projected Incident Activity 48 Hours

Abbreviation or Acronym: None

Also Known As: None

Short Description:

An estimate of the direction in which the incident is expected to spread, migrate or expand in the next 48 hours.

NWCG Data Element Name: Projected Incident Activity 72 Hours

Abbreviation or Acronym: None

NWCG Data Standard Metadata Definition

Also Known As: None

Short Description:

An estimate of the direction in which the incident is expected to spread, migrate or expand in the next 72 hours.

NWCG Data Element Name: Projected Incident Activity Beyond 72 Hours

Abbreviation or Acronym: None

Also Known As: None

Short Description:

An estimate of the direction in which the incident is expected to spread, migrate or expand in beyond the next 72 hours.

Steward: Fire Environment Committee
