SUBJECT : SAFETY ADVISORY : International Association of Fire Chiefs Safety Week

During the week of June 14-20, fire departments, firefighters, and Emergency Management Services personnel across the country will promote a safety and health week for firefighter and emergency services personnel. NWCG has been a participant with the International Association Fire Chiefs (IAFC), and other groups in the private, and public sector in supporting this call for safety.

This year's Safety Week, titled "Protect Yourself: Your Safety, Health, and Survival Are Your Responsibility," has been expanded to one week to allow participating agencies maximum flexibility for participation. Topics this year include:

- Safety – Defensive Driving and Roadside Safety
- Health & Wellness
- Wildland Urban Interface and Situational Awareness
- Operational Leadership

The NWCG Safety and Health Working Team (SHWT) urges you to take a moment of silence for line of duty deaths, and review the June 2009 Safety Gram for fatalities and serious accidents. Take time each day by providing tailgate safety sessions on one topic area each day, or provide similar brief programs that are unique, and focus on high risk, low frequency events in your daily jobs.

Attached is a list of talking points you may wish to consider when developing your Safety Week briefings. Web sites for additional information and ideas include the following: NWCG Safety and Health Working Team (SHWT) at <http://www.nwcg.gov/teams/shwt/index2.htm> , Six Minutes for Safety Program at http://www.nifc.gov/sixminutes/dsp_sixminutes.php, the Wildland Fire Safety Training Annual Refresher (WFSTAR):
