GOLD FORK

CONDITION: MAP Description: The length of the ridge to the north of the Warm Lake Road.
Intent: Protect public from hazards posed by the fire. Protect firefighters from high traffic area and allow firefighters access for operations.
Values at Risk: Public and firefighter safety.
Trigger Condition: Fire crosses or threatens to cross during the next burn period based on fire behavior.
Probability: Low to moderate. FSPRO runs from 08/26 show 0% chance of impacting within 7 days.
ACTION: Notifications: Valley County Sheriff, Boise NF LEOs, Boise NF AA, Businesses in Warm Lake area, Construction company on South Fork Road.
Recommended Management Action: Close Warm Lake Road, evacuate public from road and area, consider area closure.
RESOURCES: Resources Recommended: As needed based on fire behavior and situation.

NEEDLES RIDGE

CONDITION: MAP Description: North-south line along Needles ridge west of the perimeter.
Intent: Geographic trigger point to consider prep along the Southern Way and Gold Fork North trail systems as a potential holding feature. Re-evaluate potential for fire to threaten values further north and west.
Values at Risk: No immediate values at risk.
Trigger Condition: Fire crosses or threatens to cross during the next burn period based on fire behavior.
Probability: Low to high. FSPRO runs from 08/26 show a very high degree of impact. The higher risk is at the southern end and west to the north. Rocky terrain and isolated fuels lead to a low likelihood with the exception of the southern end of this MAP.
ACTION: Notifications: Boise NF Agency Administrators, Recommended Management Action: Implement line prep for potential indirect west of the perimeter.
Recommended Management Action: Ensure alignment with agency administration on tactical strategy for the operations. Assess current closure area and begin bridge and other actions to protect values at risk.
RESOURCES: Resources Recommended: As needed based on fire behavior and situation.

BLACKMARE LAKE

CONDITION: MAP Description: Line west to east from Needles Summit to Blackmare Lake trails.
Intent: Protect public safety.
Values at Risk: Various structures and FS recreational infrastructure.
Trigger Condition: Fire crosses or threatens to cross during the next burn period based on fire behavior.
Probability: Low. FSPRO runs show a 5-20% chance of impacting within 7 days.
ACTION: Notifications: Agency Administrators (Boise and Payette), USFS LEO.
Recommended Management Action: Ensure alignment with agency administration on tactical strategy for the operations. Assess current closure area and begin bridge and other actions to protect values at risk.
RESOURCES: Resources Recommended: As needed based on fire behavior and situation.

DOLLAR WEST

CONDITION: MAP Description: Mid-slope from the valley within the contiguous private property west of the fire.
Intent: Protect private value.
Values at Risk: Private property, State and private timberlands, public safety.
Trigger Condition: Fire crosses or threatens to cross during the next burn period based on fire behavior.
Probability: Low. FSPRO runs from 08/26 show 0% chance of impacting within 7 days.
ACTION: Notifications: Valley County Sheriff, Boise NF LEOs, Boise NF AA, Private landowners including timber management companies.
Recommended Management Action: Evacuate public, establish point protection and/or find a suitable defensive line to hold the fire.
RESOURCES: Resources Recommended: As needed based on fire behavior and situation.

DOLLAR NORTH

CONDITION: MAP Description: A line extending along the boundary between the Boise NF and the Payette NF.
Intent: Protect the public, structures, and land.
Values at Risk: Payette Flat USFS Guard Station and CG, Kinley Valley CG, Sloan's point Timber sale.
Trigger Condition: Fire crosses or threatens to cross during the next burn period based on fire behavior.
Probability: Low to high depending on location from the fire. Fire line is in the Square Top lake area. Other areas of this line show sequentially less chances as you move east and west from center line.
ACTION: Notifications: Valley County Sheriff, Boise NF LEOs, Boise NF Agency Administrator, Businesses in the Warm Lake area, Construction Company on South Fork Road.
Recommended Management Action: Evacuate public, establish point protection and/or find a suitable defensive line to hold fire.
RESOURCES: Resources Recommended: As needed based on fire behavior and situation.

SOUTH FORK RD

CONDITION: MAP Description: A line extending along the ridge west of the South Fork Road.
Intent: Protect the public, structures and land.
Values at Risk: Structures and infrastructure along the road.
Trigger Condition: Fire crosses or threatens to cross during the next burn period based on fire behavior.
Probability: Very low. FSPRO runs from 08/26 predict less than 1% chance of impact in 7 days.
ACTION: Notifications: Valley County Sheriff, Boise NF LEOs, Boise NF Agency Administrator, Businesses in the Warm Lake area, Construction Company on South Fork Road.
Recommended Management Action: Evacuate public and contractors in South Fork Road.
RESOURCES: Resources Recommended: As needed based on fire behavior and situation.

BOULDER NORTH

CONDITION: MAP Description: East-west line starting along the 446 road to the east and following topographical features ending south of Boulder Lake.
Intent: Geographic trigger to consider tactical operations to the north along the 446 road and constructed down line for burnout operations.
Values at Risk: Timber sales, Blue Lake trail system.
Trigger Condition: Fire crosses or threatens to cross during the next burn period based on fire behavior.
Probability: Moderate as the fire could advance with south winds if fuels are present. FSPRO runs from 08/27 show a 20-40% probability that fire would impact within 7 days. Area has sparse fuels and has had fire for considerable time.
ACTION: Notifications: Boise NF Agency Administrators, County Sheriff, Recommended Management Action: Continue line prep (clear and road) in advance of firing operations to serve as containment line and prevent fire spread to the north. Implement point protection where appropriate.
RESOURCES: Resources Recommended: Appropriate resources need based on fire behavior and situation.

BOULDER EAST

CONDITION: MAP Description: North-south road parallel to the eastern flank of the fire and intersecting the Boulder Creek road at the north, 446 road in the middle and road 422 to the south.
Intent: Geographic trigger for eastern spread of fire to values at risk.
Values at Risk: FS Timber Sales, Private land including structures.
Trigger Condition: Fire crosses or threatens to cross during the next burn period based on fire behavior.
Probability: Low FSPRO runs from 08/27 show a varying degree of impact from 10-80% chance. This would only occur should a spot fire establish outside current containment line due to the unknown burn within the fire perimeter.
ACTION: Notifications: Boise NF Agency Administrators, County Sheriff, Gray's Point Timber sale administrator.
Recommended Management Action: Identified containment lines would need to be improved/constructed to support burnout and tactical operations. Implement point protection as needed.
RESOURCES: Resources Recommended: Appropriate resources need based on fire behavior and situation.

STOLLE MEADOWS

CONDITION: MAP Description: Along the ridge from Cougar Rock south to a high point above Eureka Silver Mine.
Intent: Protect public safety and FS recreational values.
Values at Risk: FS Rec cabin, recreational sites, infrastructure.
Trigger Condition: Fire crosses or threatens to cross during the next burn period based on fire behavior.
Probability: Low to moderate. FSPRO runs from 08/29 show a 20-60% chance of impacting within 7 days. Fuels and slope are not in alignment and could minimize probability.
ACTION: Notifications: County Sheriff, FS LEOs, Cabin renters, Boise NF Agency Administrator.
Recommended Management Action: Evacuation of area and closure of rental cabins, structure protection.
RESOURCES: Resources Recommended: 2 engines, 1 crew, misc overhead, dependent on fire behavior.

WEST SNAG

CONDITION: MAP Description: Mid-slope from the valley within the contiguous private property west of the fire.
Intent: Protect private property.
Values at Risk: Private property, timber and public safety.
Trigger Condition: Fire crosses or threatens to cross during the next burn period based on fire behavior.
Probability: Low to moderate. FSPRO runs from 08/29 show less than 10% chance to impact this line on the southern end due to the northern portion of the edge is contained.
ACTION: Notifications: County Sheriff, Boise NF Agency Administrator, FS LEOs, Timber Company.
Recommended Management Action: Operations to coordinate with Sheriff's Office on establishing trigger points for "Ready, Set, Go".
RESOURCES: Resources Recommended: Appropriate given expected fire behavior and level of work.

WARM LAKE RD

CONDITION: MAP Description: Replaces existing MAP 3 as it was breached and no longer valid. Line (west-east) from Horseshoe Reservoir north of the Warm Lake Road and led into the North Fork Fire area.
Intent: Establish geographic trigger point in which fire operations may impact activities and need to be coordinated with operations associated with the Dollar fire.
Values at Risk: Public safety, power lines, road infrastructure.
Trigger Condition: Fire crosses or threatens to cross during the next burn period based on fire behavior.
Probability: Low to moderate. FSPRO runs show a 0-30% chance to impact this line within 7 days. Higher probability is on the northeastern end of this line due to uncontained fire in that area. Fire is currently in the 2007 North Fork fire area and movement is being limited, but shows some potential to move outside the fire perimeter.
ACTION: Notifications: County Sheriff, Boise Agency Administrators, Recommended Management Action: Consider coordinated tactical operations associated with Dollar fire. Assess fire growth potential and optimal primary/secondary containment line to limit fire growth to the west as movement continues to the north. Assess containment or suppression strategies pertaining to Dollar and Snag fire growth potential.
RESOURCES: Resources Recommended: Appropriate based on fire behavior and situation.

WARM LAKE STRUCTURES

CONDITION: MAP Description: Replaces MAP 3 to provide for additional decision space. Start line (north-south) along the six mile road of Warm Lake led into the 452 road south with Tripod Creek.
Intent: Establish geographic trigger point in which additional actions will be needed to protect public safety, structures and infrastructure.
Values at Risk: Public safety, structures, McCall Fish Hatchery, Four Mile Camp and other infrastructure.
Trigger Condition: Fire crosses or threatens to cross during the next burn period based on fire behavior.
Probability: Low to moderate. FSPRO runs from 08/29 show a 10-40% chance of impact within 7 days. Fuel, topography, and previous fire history may limit the potential for fire to impact.
ACTION: Notifications: County Sheriff, Boise Agency Administrators, Knox Ranch Spill Camp manager.
Recommended Management Action: Assess and improve structure coverage around Warm Lake and the McCall Fish Hatchery. Operations to coordinate with Sheriff's Office on establishing trigger points for "Ready, Set, Go".
RESOURCES: Resources Recommended: Appropriate based on fire behavior and situation.

IDL LAND

CONDITION: MAP Description: A line extending southeast from the junction of FR 409 to the center of section 31.
Intent: Protect IDL fire investments and FS timber sales from damage.
Values at Risk: IDL timber lands, FS timber sales.
Trigger Condition: Fire establishes or is threatening to establish across this line in the next burn period.
Probability: Low probability. FSPRO runs from 08/27 show approximately 2% chance and fire to impact this line within 7 days if containment fire is compromised.
ACTION: Notifications: Valley County Sheriff, Boise County Sheriff, Boise National Forest LEOs, Boise NF Agency Administrator.
Recommended Management Action: Establish and maintain a suitable defensive line to hold fire in USFS property.
RESOURCES: Resources Recommended: 1-2 H/Cs, Type 2 crew, strike team of engines, tenders and air support as needed.

HORSETHIEF RESERVOIR

CONDITION: MAP Description: A line 1/2 mile southeast from Clear Creek Road ending on the forest boundary. Line will extend from the Horseshoe Reservoir to the end of the planning area.
Intent: Protect public structures and land.
Values at Risk: Private property and infrastructure around Horseshoe Reservoir.
Trigger Condition: Fire crosses or threatens to cross during the next burn period based on fire behavior.
Probability: Low. FSPRO runs from 08/27 show less than 1% of impacting this line within 7 days.
ACTION: Notifications: Valley County Sheriff, Boise NF LEOs, Boise NF Agency Administrator, IDL Agency Administrator, SITPA Agency Administrator.
Recommended Management Action: Coordinate with Sheriff's Office on establishing trigger points for "Ready, Set, Go". Notify/consider evacuating. Establish point protection and/or find a suitable defensive line to hold the fire.
RESOURCES: Resources Recommended: Valley County, Idaho State, and Boise NF LEOs. Fire behavior and fire situation will dictate fire resources. Decisions made by IC/OPS, Engines, Crews, overhead, and aviation support. PFD and Liaison.

EAST MTN AND HERRICK RESERVOIR

CONDITION: MAP Description: A line extending north-south 1 mile east of the Boise National Forest western boundary. Line will extend from the Horseshoe Reservoir to the end of the planning area.
Intent: Protect public structures and land.
Values at Risk: Private property and infrastructure in the vicinity of the East Mountain and Herrick Reservoirs, Private landowners, BLM property.
Trigger Condition: Fire crosses or threatens to cross during the next burn period based on fire behavior.
Probability: Very low. FSPRO runs from 08/27 show 0% chance to impact this line within 7 days.
ACTION: Notifications: Valley County Sheriff, Boise NF LEOs, Boise National Forest Agency Administrator, IDL Agency Administrator, SITPA Agency Administrator.
Recommended Management Action: Evacuate public, establish point protection and/or find a suitable defensive line to hold the fire.
RESOURCES: Resources Recommended: Valley County, Idaho State, and Boise National Forest LEOs. Fire behavior and fire situation will dictate fire resources. Decisions made by IC/OPS, Engines, Crews, overhead, aviation support, PFD and Liaison.

BOILING SPRINGS AND SILVER CREEK

CONDITION: MAP Description: A line extending east-west through the intersection of Goat Creek and Middle Fork Payette River to Silver Creek over the ridge north to Monumental peak.
Intent: Protect safety, structures and land and coordinate with the Middle Fork Complex potential impact to the VABs from fire.
Values at Risk: USFS Boiling Springs cabin, USFS Boiling Springs/Lodgepole Creek Creek Creek Campgrounds, private property.
Trigger Condition: Fire crosses or threatens to cross during the next burn period based on fire behavior.
Probability: Moderate probability. FSPRO runs from 08/27 show 20-30% chance of impacting to the south and 5% chance to the east within 7 days.
ACTION: Notifications: Middle Fork Complex Operations Section, Valley County Sheriff, Boise County Sheriff, Boise National Forest LEOs, Boise National Forest Agency Administrator, SITPA Agency Administrator.
Recommended Management Action: Coordinate with Middle Fork Complex IC/Operations to ensure identified VABs are protected by other NF operations.
RESOURCES: Resources Recommended: Point protection managed by the Middle Fork Complex IFF which have identified and related the appropriate resources.

EAST MTN WAY

CONDITION: MAP Description: North-South line along East Mountain Way Trail.
Intent: Geographic trigger point to consider coordinated burnout operations with Snag fire (Division Y) to establish containment line and prevent fire growth to the west.
Values at Risk: Horseshoe Reservoir, private property.
Trigger Condition: Fire crosses or threatens to cross during the next burn period based on fire behavior.
Probability: Moderate. FSPRO runs from 08/27 show a 50-70% chance of impacting this line within 7 days.
ACTION: Notifications: County Sheriff, Agency Administrators (Boise NF, IDL, SITPA).
Recommended Management Action: Coordinate operations with DIV Y on Snag fire and consider burnout operations along the 405, 406 and Clear Creek roads to establish an indirect containment line and prevent fire growth to the west.
RESOURCES: Resources Recommended: As appropriate based on fire behavior and situation.

MIDDLE FORK PAYETTE

CONDITION: MAP Description: North-south line between Middle Fork Payette and Sixteen to One trail.
Intent: Geographic trigger point which highlights potential for fire growth to the north and highlight MAP 8 actions. Also notify Middle Fork Complex potential impact to the VABs from fire.
Values at Risk: No immediate values other than potential for large fire growth and indirect impact to MAP 8 values.
Trigger Condition: Fire crosses or threatens to cross during the next burn period based on fire behavior.
Probability: Moderate to high. FSPRO runs from 08/27 predict 80% chance that fire impacts this line within 7 days. If the fire crosses the Middle Fork it has continuous fuels and slope and west wind alignment.
ACTION: Notifications: Boise NF Agency Administrators, Middle Fork Complex Operations.
Recommended Management Action: Coordinate with Snag fire DIV Y and consider lines for burnout operations identified in MAP 8.
RESOURCES: Resources Recommended: As appropriate based on fire behavior and situation.

GOAT CREEK

CONDITION: MAP Description: North to south line west of Goat Creek on SW flank of the fire.
Intent: Trigger tactical operations to prepare line and protect resource to the west of the fire.
Values at Risk: Timber sale units, private property.
Trigger Condition: Fire crosses or threatens to cross during the next burn period based on fire behavior.
Probability: Moderate to high. FSPRO runs from 08/27 show 80-100% chance of impacting this line within 7 days. Fire has spread across Goat Creek and thus fuel load and slope alignment for potential fire growth.
ACTION: Notifications: Boise NF Agency Administrators, County Sheriff, Recommended Management Action: Assess and consider prep along East Mountain Way trail.
Horseshoe Actions: Prep trail system for potential burnout operations.
RESOURCES: Resources Recommended: As appropriate based on fire behavior and situation.
