

At the Unit Level, an organization determines a need to create, remove, or modify a Unit Identifier and submits a written request to their Geographic Area Unit Identifier Custodian

GACC Organizational Data NWCG Unit ID Custodian (GOUIDC) ensures Standard/Business Rules are inline with the request.

This process will be similar to how it's currently handled in OIS and Unit Idx in EDG

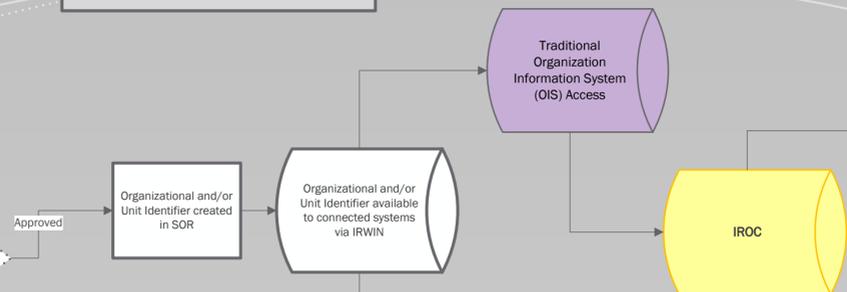

GOUIDC inputs request into System of Record (SOR) EDG

Organizational Data & Unit ID Board (UIB) Chair/Vice-Chair Approve and Publish in SOR

SIT/209

SIT/209 queries Unit ID updates monthly

- Dispatch Center ID
- POO Protecting Unit
- POO Jurisdictional Unit

FireCode

- Host Unit ID (Protecting Unit)

WFDSS

- WFDSS uses the NIFC Unit ID Service. All of the fire planning/policy information is keyed to the Unit ID and the NIFC Unit ID service is queried nightly for updates.
- When there is a new Unit ID, Users can't immediately load their front end data to it. The Agency GIS Manager must first send the GIS data to the WFDSS team to load in the application. Once this is done, it is up to the user to copy all of their fire policy documentation over and associate it with the new Unit ID.
- If there is a delay between when the GIS layers are loaded and when the policy is entered there could be some potential impacts.

**Of note, if a Unit ID has been retired/inactivated it isn't removed from WFDSS. For example: when two Forests consolidate i.e., the Helena and Lewis & Clark - those Unit IDs will remain and be associated with historical decisions. However, these deprecated Unit IDs should not be used for new incidents.

INFORM

- Protecting Unit
- Jurisdictional Unit

WFLP

- WFLP exchanges data via IRWIN GUIDs no tie to NWCG Unit IDs with data exchange

Resource Organizations

Unit ID

IQCS queries Monthly for Unit ID updates. Not automated manual process

IQCS

- Resource Provider Unit

IQS

- Resource Provider Unit
- Home Unit

Qualification Systems have no way of knowing if resources associated with a Unit ID needs to be moved to another Provider Unit upon deactivation or added to a new Unit ID upon activation. Users need to work with their systems Managers, Business Lead and Application Steward to implement changes

Unit ID Incident Data within IRWIN

- Protection Unit - Manually entered from the CADs
- Dispatch Center ID (sent from participating system)
- Fiscally Responsible Unit
- GACC derived by IRWIN
- POO Dispatch Center ID IRWIN Derived
- POO Jurisdictional Unit IRWIN Derived
- POO Jurisdictional Parent ID
- POO Protecting Agency IRWIN Derived from the POO Protecting Unit
- Unique Fire Identifier derived by IRWIN using year, protecting unit and local identifier
- POO Jurisdictional Agency
- Contract Provider Unit
- Owner Agency - Derived from Provider Unit
- Owner Org - Derived from Provider Unit
