### 1. Short-term Plan Update:

- Most GACCs transitioning Tuesday--ingest file ready to go
- NW ready on/about 1 June
- NOPS/SOPs ready
- RM - Chuck doing analysis--working temporary disclaimer if analysis isn't ready by 1 Jun (expect it to be ready by 1 June)
- Southern Area - not ready, will be working it later this summer, adding disclaimer pending approval on 1 June

• **NOTICE:** Please note the underlying forecast data in the 7-Day Significant Fire Potential Outlook is unavailable due to the product being transitioned to NFDRSv4. This is expected to continue through summer of 2022 or until the NFDRSv4 database is completed. The 7-Day Significant Forecast Product will be issued based on available weather and fire danger using forecaster discretion.

\*will add "Fire Potential" to the disclaimer

- ingest data for 7-day that was supposed to be done by Mr. Jolly--he is still working on it, no estimated date of completion
  - reached out for help--Josh has created the ingest file for predictive services.
  - he will be available ad-hoc throughout the summer if issues arise
