

NATIONAL WILDFIRE COORDINATING GROUP

Curriculum Management Issue Paper #153

Change in Modality of RT-373, Unmanned Aircraft Systems (UAS) Incident Operations Refresher 7/6/2026

BACKGROUND

The Unmanned Aircraft Subcommittee (UASC) has changed the RT-373, Unmanned Aircraft Systems (UAS) Incident Operations Refresher from an instructor-led refresher to an online self-directed refresher on the Wildland Fire Learning Portal (WFLP). UASC maintains this course's design criteria under the oversight and stewardship of the Aviation Management Committee.

CURRENT STATUS

The Enterprise Data Governance (EDG) database and WFLP catalog page list RT-373 as instructor-led, which is inaccurate with the updated UASC materials.

RECOMMENDATION

Update the EDG database and WFLP course catalog page to reflect the modality change.

APPROVED

Matt Nielsen

Qualifications Management Committee Chair
