

Fire Prevention Education Team (FPET) Subcommittee

Meeting Minutes: 08/19/2021

Attendees

Present:

Absent:

Old Business

New Business

Action Items

Incident and Position Standards Committee, Request for Change letter - Zach will draft the letter and forward to Fred and committee for review. Would like to add P310 as a training requirement for PETM and P410 for PETL. The letter will then be sent to parent committee CEPC for consideration.

Other Business

Round Robin –

Zach - there's a call for presentations for the [New Mexico Virtual Wildland Urban Fire Summit](#). Please sign up if you would like to present.

Maureen/Karen – Firenet email options. The firenet support team is working with Karen and Zach to explore either a group mail option for email daily updates during assignments or using the new incident team request process so each team assignment would have its own team site. There are pros and cons to both, but we have received some feedback from some that using the team leaders firenet email address is not the best configuration. More to come on this. Also, a reminder for local FPETS, please use the spreadsheet so we can capture your activities for the EOY report.

Maureen – the formal request for the next team is in so, we are with no one on deck. Maureen is going to send out once again to TL ref resources. Also, how we can access what resources are avail? Some dispatch centers are not willing to do IROC search queries for PETL and PETM. National Fire desk is also not an option.

Leadership Levels for Fire Prevention Positions

The Leadership Committee is assigning leadership levels to all NWCG positions. They took a shot at what they thought each position should be (see PMS 308 chart attached) and are asking the position stewards to validate the information.

Descriptions of the leadership levels can be found at <https://www.nwcg.gov/committees/leadership-committee/leadership-levels>
