AGENDA ITEMS

Topic: Incident Commander, Complex (ICCI) Pathway(s)

Presenter: Shane Greer

Discussion/Considerations:

- ICSC needs to provide a recommendation in response to proposal to remove the ICT3 requirement to obtain ICCI qualification. This would enable other Type 1 or Complex C&G members that never obtained ICT3 certification to pursue the ICCI qualification. What should this pathway look like?
- Also need to consider and recommend what the pathway should look like from ICT3 to ICCI now that the Type 2 level qualification is going away.
- Shane will frame up the issues and work with Robin to provide a platform for ICSC members and the larger IC community to submit pathway recommendations through. Then ICSC will review, vote and submit to IPSC.

Decision: No Decision, No Quorum
