IROC update: Bill Fletcher/ Beth Spencer

Beth: IROC Overview

IROC will be delayed on the go live date to March 10-12.

Complexity of IRWIN has been underestimated and will take more work to get everything to integrate.

IRWIN go live is March 9th.

Need to ensure that the dispatch centers clean their data in ROSS to ensure the data is clear coming over to the new IROC.

Training strategy is being reviewed and will be updated. Trying to get a full training package together before giving material out to the masses. Working on how the best way is to present the training.

There will be a quarterly news letter that will be circulated to ensure users are kept apprised of the progress.

Bill:

The highest risk for the later date is the risk of rolling out during high fire activity and training.

Training is and will remain a priority for IROC. Recommend that the ROSS D310 continues forward with training.

ROSS Training server will be turned off MID April.

****** ROSS training will be shut down April 2020******
