IROC update: Bill Fletcher/ Beth Spencer : NOT on the CALL

IROC will be delayed on the go live date to March 10-12.

Complexity of IRWIN has been underestimated and will take more work to get everything to integrate. IRWIN go live is March 9th.

Need to ensure that the dispatch centers clean their data in ROSS to ensure the data is clear coming over to the new IROC. **Note: Dispatch community waiting for direction on clean up.**

Training strategy is being reviewed and will be updated. Trying to get a full training package together before giving material out to the masses. Working on how the best way is to present the training.

There will be a quarterly news letter that will be circulated to ensure users are kept apprised of the progress. **NOTE: This letter came out last week and should have been pushed through the dispatch community.**

Training is and will remain a priority for IROC. Recommend that the ROSS D310 continues forward with training. ROSS Training server will be turned off MID April.

******* ROSS training will be shut down April 2020*******

“I contacted all the lead instructors for D311/D312 and heard back from Katie Williamson, Amy Lancaster, and Sean Lodge. Katie and Amy both have google drives for their GACCs with edits they have been making to the material along the way. (Wish I would have thought of that). “
