

ADS Permission State

Status: Approved

Description

Indicates the permission hierarchy that is currently being applied when a system utilizes the Update Incident operation.

Business Rules

1. The default value when an incident record is submitted is "DEFAULT".
2. The ADSPermissionState must be set to FIREREPORTING when the FireOutDateTime is set to a value other than null.
3. The ADS brokers which systems can change this value in each state.
4. Must match a valid value.
