

Created On Date-Time (GIS)

Status: Approved

Description

Date the feature was created in GIS. Automatically collected by AGOL.

Business Rules

1. Must be submitted for exchange in Unix epoch format. This field is number of milliseconds since 1 January 1970 00:00:00 Universal Time. See <https://www.epochconverter.com/> for help converting dates to this format.
2. Time zone should be documented in metadata.
3. The time must be submitted in milliseconds and should be exactly 13 digits in length.
4. Date should follow the 24 hour clock, YYYY-MM-DDThh:mm:ssZ, ISO8601 Standard.
5. Date/time values must be UTC (z) and UI displays local incident time.
6. Date/time values with UTC offset must be rendered in local incident time for the user interface and business use (including downloaded products).
7. Format must be in short date time MM/DD/YYYY with HH:MM on a 24-hour clock for the user interface and business use (including downloaded products).

Identity & Classification

Label	Created On Date-Time (GIS)
Data Element Type	String Data Element
Generated Value	Yes
Approval Status	Approved

Format Specification

Data Exchange	
Data Exchange Name	GISCreatedOnDateTime
Format	Unix epoch format (milliseconds since January 1, 1970)
Length	13
Physical Data Type	NUMERIC
Example	1483228800000

Data Display	
Format	Human Readable Format: MM/DD/YYYY with HH:MM on a 24-hour clock
Physical Data Type	DATETIME

Geospatial Attribute	
Attribute Name	created_date
Size/Width	12
Physical Data Type	DATE
Example	2014-06-23-15.30Z
