

Frequency Tone Number

Status: Approved

Description

A very low audio signal between 50-300 Hz (transmitted at a very low level/below hearing range) that your receiver system filters out and decodes to allow your radio/scanner to listen only to the station transmitting the code and to block out all others on that frequency.

Identity & Classification

Label	Frequency Tone Number
Data Element Type	String Data Element
Applies To	Frequency
Approval Status	Approved

Format Specification

Data Exchange	
Data Exchange Name	Tone
Format	###.# A#A ###
Format Notes	3-5 characters (including the decimal)
Max Length	5

Min Length	3
Scale	1
Physical Data Type	ALPHANUMERIC
