

Height Above Sea Level

Status: Approved

Description

Height above mean sea level in feet.

Business Rules

- 1. Height above mean sea level in feet.
- 2. Scale of 1 decimal place.
- 3. Feature height should always be calculated to measure the tallest part of the features.
For example, the height of a windmill feature will be the height of the blade as opposed to the height of the tower.
- 4. Null value is acceptable.

Identity & Classification

Label	Height Above Sea Level
Data Element Type	Numeric Data Element
Approval Status	Approved

Format Specification

Data Exchange	
Data Exchange Name	HeightAboveSeaLevel
Physical Data Type	NUMERIC
