

Incident Complexity Level

Status: Approved

Description

The current management level utilized to manage a wildland fire event. The incident level established by completing an incident complexity analysis considering the level of difficulty, severity, or overall resistance the incident or event presents to incident management or support personnel as they work to manage it; a categorization that helps leaders compare one type of incident or event to another.

Identity & Classification

Label	Incident Complexity Level
Data Element Type	String Data Element
Approval Status	Approved

Format Specification

Data Exchange	
Data Exchange Name	IncidentComplexityLevel1
Format	X(25)
Max Length	25
Physical Data Type	ALPHANUMERIC

Permissible Values

Permissible Values for Incident Complexity Level *(continued)*

Label
Complex Incident
Type 1 Incident
Type 2 Incident
Type 3 Incident
Type 4 Incident
Type 5 Incident

For data exchange, use the Label value (e.g., 'Type 3 Incident').
