

Initial Response Size

Status: Approved

Description

An estimate of acres burning at the time of initial response. More specifically when the IC arrives and performs initial size up.

Business Rules

1. The estimate should include number of acres within the current perimeter of a specific, individual incident, including unburned and unburnable islands.
2. Minimum size = 0
3. Wildfires must be greater than zero
4. False Alarms must = 0
5. Exchange precision is .01
6. Size should be associated with a Date/Time
7. As a minimum, fires less than one acre will be reported to the hundredth of an acre.
8. As a minimum, fires greater than one acre will at least be reported to the nearest acre.

Identity & Classification

Label	Initial Response Size
Data Element Type	Numeric Data Element

Approval Status	Approved
