Identity & Classification

Label	Start Date-Time (training course)
Data Element Type	String Data Element
Approval Status	Approved

Format Specification

Data Entry

Format	ISO 8601 Format: YYYY-MM-DDTHH:MM:SSZ US Format: MM/DD/YYYY HH:MM YYYY = the calendar year MM = the calendar month of the year DD = the calendar day of the year HH = the hour MM = the minutes SS = the seconds Z = zulu
Physical Data Type	DATETIME
Example	ISO 8601 Format: 2017-01-01T00:00:00Z US Format: 01/01/2017 00:00

Data Exchange

Data Exchange Name	CourseStartDate
Alternate Data Exchange Name	StartDate
Format	Unix epoch format (milliseconds since January 1, 1970)
Length	13
Physical Data Type	NUMERIC
Example	1483228800000

Data Display

Format	Human Readable Format: MM/DD/YYYY with HH:MM on a 24-hour clock
Physical Data Type	DATETIME

Geospatial Attribute

Attribute Name	CourseStartDate
Alternate Attribute Names	CourseStart
Physical Data Type	DATE
Example	2014-06-23-15.30Z
