

Strategic Decision Date-Time

Status: Grandfathered

Description

The Decision Publish Date represents the date Agency Administrators published (approved) the Strategic Decision document. New decisions can be created and published at any time until the incident has been called out.

Business Rules

1. Must be submitted for exchange in Unix epoch format. This field is number of milliseconds since 1 January 1970 00:00:00 Universal Time. See <https://www.epochconverter.com/> for help converting dates to this format.
2. Time zone should be documented in metadata.
3. The time must be submitted in milliseconds and should be exactly 13 digits in length.
4. Date should follow the 24 hour clock, YYYY-MM-DDThh:mm:ssZ, ISO8601 Standard.
5. Date/time values must be UTC (z) and UI displays local incident time.
6. Date/time values with UTC offset must be rendered in local incident time for the user interface and business use (including downloaded products)
7. Format must be in short date time MM/DD/YYYY with HH:MM on a 24-hour clock for the user interface and business use (including downloaded products)

Identity & Classification

Label	Strategic Decision Date-Time
Data Element Type	String Data Element
Approval Status	Grandfathered
